

ON-DEMAND IDENTIFICATION FOR PUBLIC NOTIFICATIONS

REACH MORE OF THE PUBLIC WITH YOUR NOTIFICATIONS

In an emergency, it's critical to notify everyone that may be affected. But that may prove to be difficult or even impossible if your contact information is incomplete or out of date.

Now there's a solution that ensures you have the essential contact data you need, when you need it.

TARGUSinfo On-Demand IdentificationSM for emergency notifications.

Close the Gaps in Your Contact Information

In an emergency, you need to go beyond verification sources that rely on publicly available data. These sources are often inaccurate, out of date and lack key information. With over 90 unique sources of data, many of them proprietary, we offer the widest coverage available for your notification efforts.

With On-Demand Identification, you can instantly access complete and accurate contact information, ensuring your emergency notification system functions efficiently and without fault.

A Flexible and Effective Solution

With TARGUSinfo On-Demand Identification for emergency notifications, you can:

- **Contact more residents and businesses** with the most current and complete contact information available, including data on wireless, VoIP and other nonpublic phone numbers
- **Retrieve the data you need, at any time**, with 24/7 access to our network
- **Send area-specific messages** within a larger geographic region

With immediate access to complete and current contact information, your emergency notifications will be delivered quickly and without delay — saving you precious time when it matters the most.
